

A - Training on Galaxy: Metabarcoding

October 2023 - webinar

GALAXY Practice

LUCAS AUER, MARIA BERNARD, LAURENT CAUQUIL, VINCENT DARBOT, MAHENDRA MARIADASSOU, GÉRALDINE PASCAL & OLIVIER RUÉ

Objectives of the 1st part

- Learn the basics of Galaxy
- Prepare the 1 dataset for FROGS formation

What is Galaxy?

Galaxy software framework

- Galaxy is an overlay that allows researchers without computer expertise to perform computational analyses online, automate them and share the results easily.
- Developed by the Galaxy Team Project.
- Relies on a computational infrastructure (Server).
- Open source

Galaxy software framework

Where to use Galaxy?

- Galaxy software can be installed and run on powerful server farms (Cluster) or on your individual PC.

The image displays three vertical panels, each representing a different Galaxy installation location. Each panel lists technical specifications and provides navigation buttons.

- Genotoul Bioinfo (Toulouse):**
 - Location: **Toulouse**
 - Compute (#CPU HT*): **6224**
 - Storage (#TB): **4400**
 - RAM (#GB): **36500**
 - RAM/core (#GB): **5.56**
 - GPU (#Card): **1**
- mig:ole (Jouy en Josas):**
 - Location: **Jouy en Josas**
 - Compute (#CPU HT*): **1016**
 - Storage (#TB): **350**
 - RAM (#GB): **7000**
 - RAM/core (#GB): **6.89**
 - GPU (#Card): **-**
- IFR CORE (Orsay (IDRIS)):**
 - Location: **Orsay (IDRIS)**
 - Compute (#CPU HT*): **4300**
 - Storage (#TB): **2400**
 - RAM (#GB): **20008**
 - RAM/core (#GB): **4.65**
 - GPU (#Card): **-**

Each panel includes a 'Demande de compte' button, a 'Support communautaire' button, and a 'Documentation' button. The bottom of each panel features the Galaxy logo and, in the case of IFR CORE, logos for R Studio and GitLab.

Where to use Galaxy?

- The Toulouse Galaxy platform: <https://vm-galaxy-prod.toulouse.inrae.fr>
- Institut Français Bioinformatique IFB (national server): <https://metabarcoding.usegalaxy.fr>
- Migale Platform: galaxy.migale.inra.fr
- Others...

 The different platforms of Galaxy are not connected together

- Galaxy is installed on many clusters across the world.
- Some tools are in our Galaxy platform but not in other platforms.
- Your data is not shared with other Galaxy platforms than ours.

- **24th July 2020:** Added [NCBI accession Download](#) in Section *Get Data*.

Exemple of Galaxy platforms

The screenshot displays the Galaxy Toulouse web interface. At the top, the navigation bar includes the logo, the name 'Galaxy Toulouse', and menu items for 'Workflow', 'Visualize', 'Données partagées', 'Aide', 'Utilisateur', and a grid icon. A status indicator on the right shows 'Using 32%'. Below the navigation bar, a message states: 'New Galaxy server, needed tools/databanks are added on demand'. The main content area features a large logo for 'Galaxy Toulouse Main' with a 'NEW' stamp, and a welcome message: 'Welcome to new main Galaxy-Toulouse server'. Below the logo, there are sections for 'go to Latest news', 'Support', 'How to cite use of our Galaxy instance?', and 'The main changes are:'. The left sidebar contains a 'Tools' section with a search bar and an 'Upload Data' button, followed by categories: 'BASIC TOOLS' (Monitoring, Get Data, Send Data, Collection Operations, Lift-Over, Text Manipulation, Convert Formats, Filter and Sort, Join, Subtract and Group, Fetch Alignments/Sequences, Operate on Genomic Intervals, Statistics, Graph/Display Data), 'ADVANCED TOOLS', and 'FROGS' (OTUS RECONSTRUCTION, FROGS Demultiplex reads, FROGS Pre-process merging). The right sidebar shows a 'History' section with a search bar and a message: 'Cet historique est vide. You can Charger vos propres données or Charger des données depuis une source externe'.

ADVANCED TOOLS

FROGS

- OTUS RECONSTRUCTION
- FROGS Demultiplex reads Attribute reads to samples in function of inner barcode.
- FROGS Pre-process merging, denoising and dereplication.

Welcome to new main Galaxy-Toulouse server

Galaxy Toulouse Main NEW

[go to Latest news](#)

This new Galaxy server replaces the one set up in 2016 (version 16.01) and configured to submit jobs on a SGE HPC cluster using a global account.

Support

Support is configured in Galaxy to send help requests to support.sigena@inrae.fr
Use this address to contact us in case of problems

How to cite use of our Galaxy instance?

Depending on the help provided you can cite us in acknowledgements, references or both. Examples: Research teams can thank the Toulouse Midi-Pyrenees bioinformatics platform and Sigena group, using in their publications the following sentence:
"We are grateful to the genotoul bioinformatics platform Toulouse Midi-Pyrenees and Sigena group for providing help and/or computing and/or storage resources thanks to Galaxy instance <https://vm-galaxy-prod.toulouse.inra.fr>".
In cases of collaboration, you can directly quote the person who participated to the project, contact him to have his accurate contact details for quote.
References: X. SIGENAE [<http://www.sigena.org/>]

The main changes are:

- new version of Galaxy server: 21.05
- reorganization and cleaning of tool list with recent versions
- submit jobs on the new Slurm HPC cluster, using connected Galaxy user's account and CPU quota.
- new storage volume for Galaxy datasets, with a quota of 250GB per user

History Rechercher des données

Unnamed history (empty)

Cet historique est vide. You can Charger vos propres données or Charger des données depuis une source externe

Exemple of Galaxy platforms

The screenshot displays the Galaxy France web interface. At the top, a dark navigation bar contains the 'Galaxy France' logo, a home icon, and menu items for 'Workflow', 'Visualize', 'Données partagées', 'Aide', 'Utilisateur', and a grid icon. A 'Using 0%' indicator is on the right. The left sidebar is a 'Tools' menu with a search bar and an 'Upload Data' button. It lists categories: 'Get Data', 'Collection Operations', 'GENERAL TEXT TOOLS' (with sub-items like 'Text Manipulation', 'Join, Subtract and Group', 'FASTA/FASTQ', 'FASTQ Quality Control'), 'METAGENOMICS' (with sub-items like 'DADA2', 'FROGS', 'Qime', 'Obitools', 'PICRUST', 'Mothur'), 'STATISTICS AND VISUALISATION' (with sub-items like 'Graph/Display Data', 'Interactive Tools'), and 'WORKFLOWS' (with sub-item 'All workflows'). The main content area features a 'Welcome to metabarcoding.usegalaxy.fr' message with a blue notification box stating: '13/01/2022: usegalaxy.fr is now running the release 21.09 of Galaxy. Please check the 21.09 user release notes.' Below this, it says 'Hosted by:' followed by logos for IFR, eLife, and a circular logo. A paragraph follows: 'The Galaxy Project is supported in part by NSF, NHGRI, The Huck Institutes of the Life Sciences, The Institute for CyberScience at Penn State, and Johns Hopkins University.' The right sidebar is a 'History' panel with a search bar 'Rechercher des données' and a 'test ITS' section showing '42 shown, 10 deleted' and '276.74 MB'. A list of jobs is shown, including '52: FROGSSTAT Deseq2 Visualisation: report.nb.html', '49: FROGSSTAT DESeq2 Preprocess: dds.Rdata', '48: FROGSSTAT Phylose q Multivariate Analysis Of Variance: manova.nb.html', '47: FROGSSTAT Phylose q Structure Visualisation: structure.nb.html', '46: FROGSSTAT Phylose q Sample Clustering: clustering.nb.html', '45: FROGSSTAT Phylose q Beta Diversity: beta_diversity.nb.html (wunifrac.tsv)', '44: FROGSSTAT Phylose q Beta Diversity: beta_diversity.nb.html (unifrac.tsv)', and '43: FROGSSTAT Phylose'.

Tools

search tools

Upload Data

FROGS

FROGS Demultiplex reads Attribute reads to samples in function of inner barcode.

FROGS Pre-process merging, denoising and dereplication.

FROGS Clustering swarm Single-linkage clustering of OTUs based on

AVAILABLE TOOLS

FROGS Remove chimera Remove PCR chimera from OTUs.

FROGS OTU Filters Filters OTUs on several criteria.

FROGS ITSx Extract the highly variable ITS1 and ITS2 subregions from ITS sequences.

FROGS Affiliation OTU Taxonomic affiliation of each OTU's seed by RDP tools and BLAST

Optional step to resolve inclusive amplicon ambiguities and to aggregate OTUs based on alignment metrics

FROGS Abundance normalisation

FROGS Pre-process merging, denoising and dereplication. (Galaxy Version 3.2.3+galaxy2)

Sequencer

Illumina

Select the sequencing technology used to produce the sequences.

Input type

Files by samples

Samples files can be provided in a single TAR archive or sample by sample (with one or two files each).

Are reads already merged ?

No

The inputs contain 1 file by sample : R1 and R2 pair are already merged in one sequence.

Samples

1: Samples

Name

The sample name.

Please provide a value for this option.

Reads 1

No fastq dataset available.

Reads 2

No fastq dataset available.

R2 FASTQ file of paired-end reads.

RESULTS VISUALISATION AND TOOL PARAMETER WINDOW

This is your working environment for analysing your data

Vocabulary of Galaxy

- **Tools:**

- A tool has a function which is explained when you click on it.
- Each Galaxy platform has its own tools.

- **Datasets:**

- A dataset is a file, uploaded to Galaxy by you or produced by a tool.
- Be careful: a dataset has a datatype.

- **Histories:**

- A tool generates datasets and these datasets are stored in the current history.
- Everything is permanently saved.
- If you log off your computer or browser, it's ok, everything will keep running and be saved!

Pratice:

DISCOVER GALAXY

Exercise

1. Visit the Galaxy Platform.
2. Look at the tool list.
3. Display only FROGS tools.
4. Display all tools concerning fastq files.

Manipulate Histories

Practice:

CREATE THE NECESSARY HISTORY FOR FROGS TRAINING

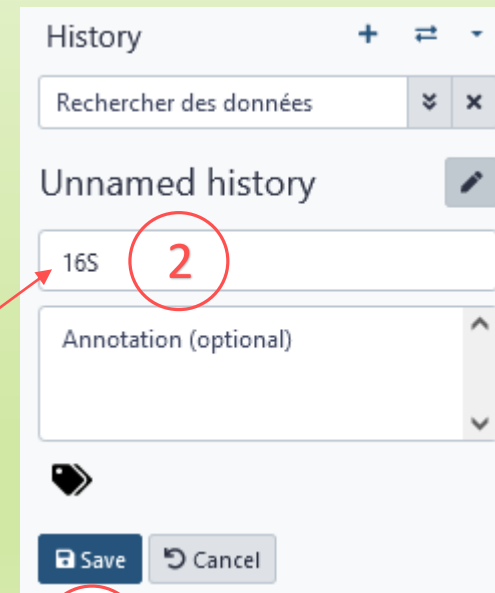

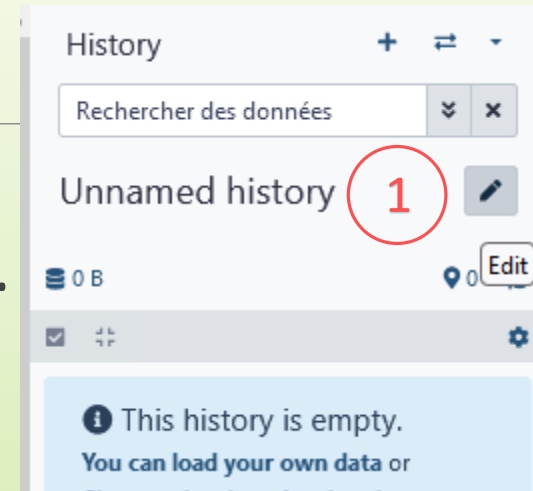

To create a new history:

- Click on the plus.

To rename a history:

- Click on the pen next to “Unnamed history” (top right).
- Enter « 16S ».
- Hit « **Enter** » to validate.

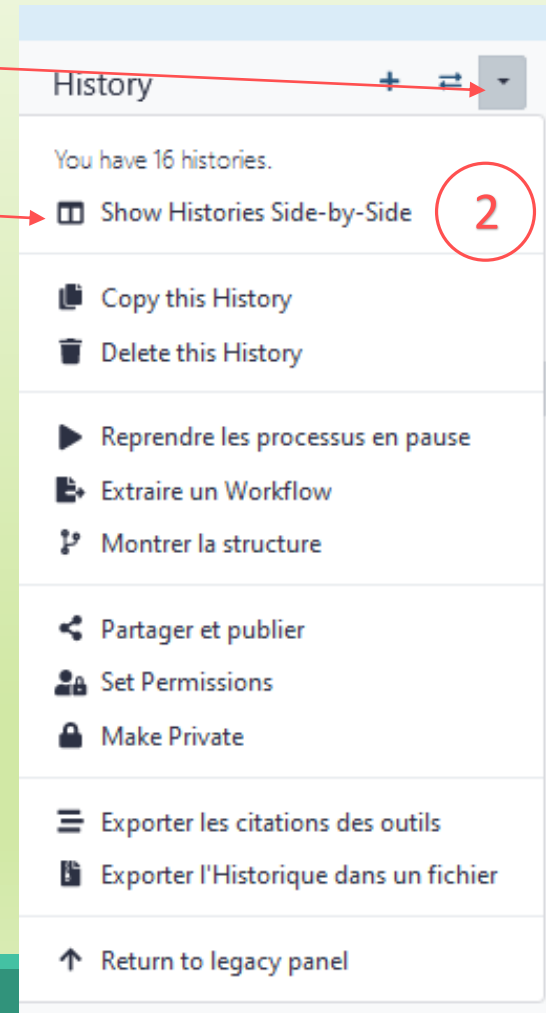

Exercise

- Create another history as before with 16S. This new history will be named **ITS**

How to list all histories?

1. To view all histories, click on this arrow
2. And click on

Explore the « View all histories » section

.fasta

Datasets for 16S history

Datasets for ITS history

All samples are in archive .tar.gz

Remark: how create an archive ?

Not for this session, but for your own data, it will be important to know how create an archive.

To learn how create an archive

[http://genoweb.toulouse.inra.fr/~formation/15 FROGS/Webinar data
/How create an archive.pdf](http://genoweb.toulouse.inra.fr/~formation/15_FROGS/Webinar_data/How_create_an_archive.pdf)

Create an archive is
always possible !
It is our recommendation.

Practice: 16S history

UPLOAD FILE FROM AN URL

How to import your data to Galaxy ?

- Several ways to upload your data to Galaxy:

- From your computer

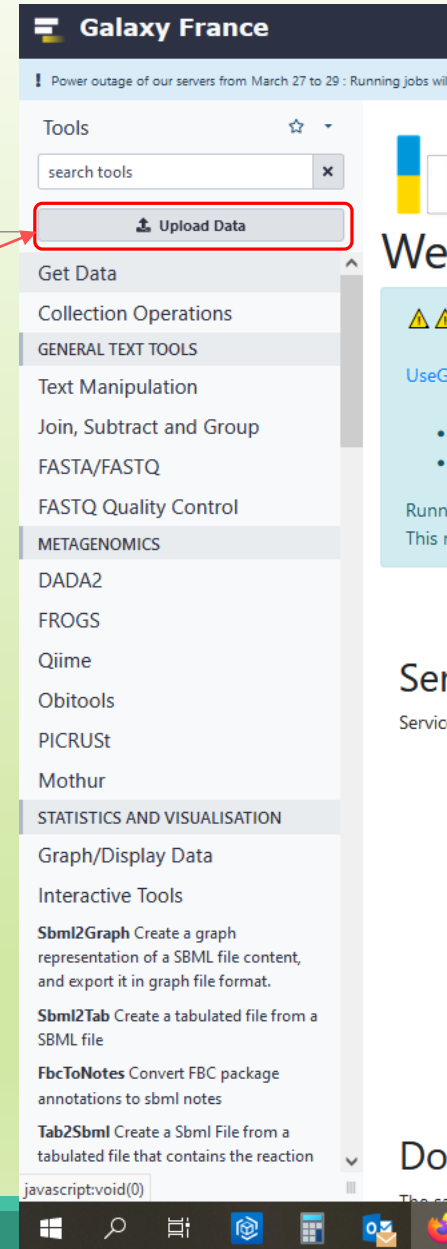

- By URL

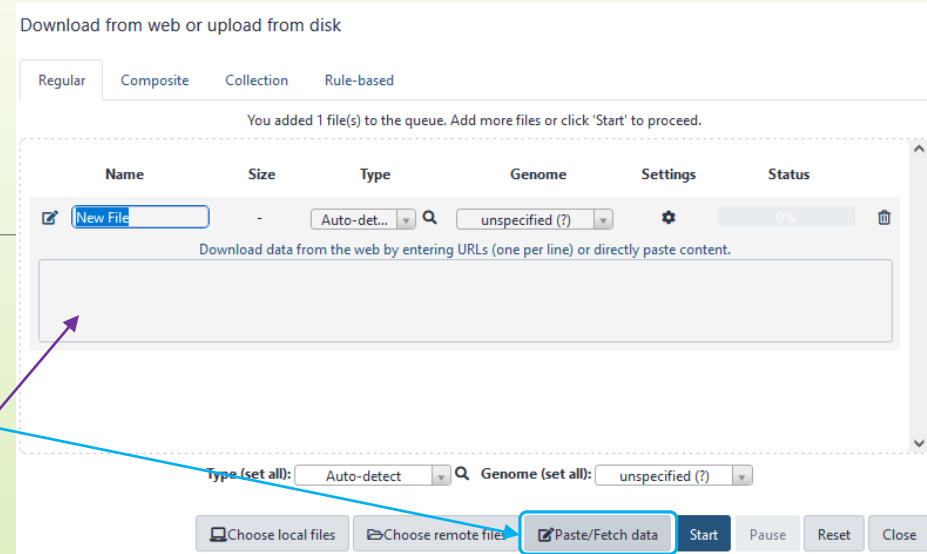

16S history creation

1. In your current history "16S" (If it not the case, switch to 16S history)
2. Go to **Upload Data** on the left panel

16S history creation

3. Click on **Paste/Fetch Data**

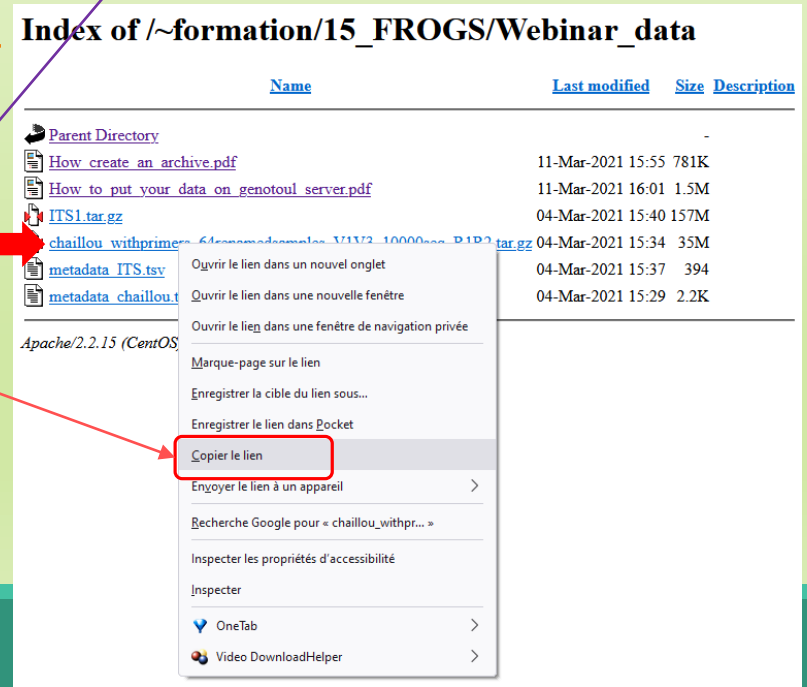

4. Collect your data address on [http://genoweb.toulouse.inra.fr/~formation/15 FROGS/Webinar data/](http://genoweb.toulouse.inra.fr/~formation/15_FROGS/Webinar_data/)

Click right on the name file

5. Copy the address of the link

6. Paste the link in the grey window

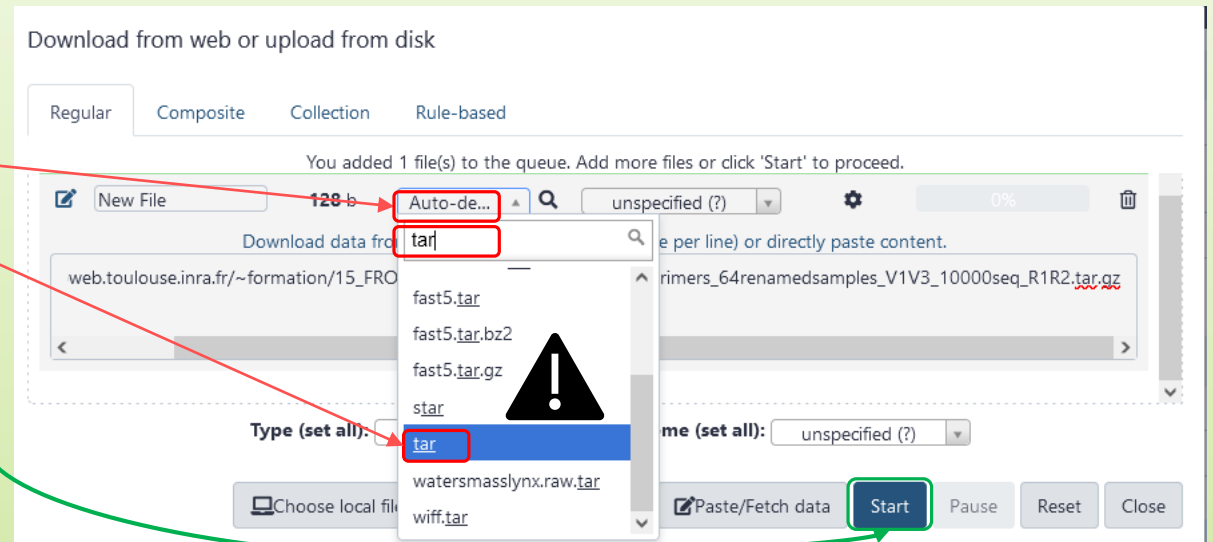

16S history creation

7.  Change the data type!

8. Click on Start

9. Start again with the file metadata_chaillou.tsv
