

Paleofish Mitochondries

Objectif : Lancement de Eager sur référence majoritaire

CR réunion du 16 oct 2025

- Mise à disposition des scripts dans une forge INRAE : Forge : https://forge.inrae.fr/bios4biol/mt_paleofish
- Présentation des résultats du second multimapping Brachymystax
- Présentation des résultats de recherche des mitogénomes dans les whole génomes.
- Lancer des pipelines Eager avec les mitogénomes précédemment définis.

Rappel résultats des multimapping

4 Undetermined
5 Autres que S. salar et S.trutta
32 S. salar
47 S. trutta

88 échantillons

L11_7_SCO_1354_S70:NC_006531.1:182488 → Anguille
NC_006535.3 164611 *Anguilla bicolor pacifica*

L0_4_EG9_S84:NC_012928.1:19566 → Thymallus thymallus
NC_056303.1 12714 *Thymallus ligericus*

L2_4_CD2_S74:NC_018341.1:5799 → Brachymystax
NC_018341.1 727 *Brachymystax lenok*

L0_5_EG10_S85:NC_020762.1:38793 → Coregonus
L7_14_22d_S48:NC_020762.1:1255682
L0_5_EG10_S85 : NC_002646.1 6117 *Coregonus lavaretus*
L7_14_22d_S48 : NC_020765.1 186123 *Coregonus oxyrinchus*

Méthodologie pour la préparation des whole génomes

Deux cas de figure :

- 1/ Retrait des scaffolds avec seqtk puis ajout du mitogénome avec cat
- 2/ Modification du nom de la circular target dans le pipeline de lancement Eager

Résultats du double pass Eager

Partage des scripts dans la forge INRAE

The screenshot displays the Forge INRAE web interface. The browser's address bar shows the URL `forge.inrae.fr/bios4biol/mt_paleofish`. The left sidebar contains navigation options: a search bar, repository statistics (3 repositories, 5 issues), a project list with **MT_Paleofish** selected, and links for Pinned items, Issues, Merge requests, and a Manage section. The main content area features a warning message about SSO/SAML authentication, a repository header for **MT_Paleofish** with a lock icon, and a dropdown menu showing the `main` branch and the repository name `mt_paleofish`. Below this, there is a section for adding a new directory, showing a recent commit by Sarah Maman-Haddad. At the bottom right, there are buttons for '+', 'Find file', 'Code', and a 'History' link next to the commit hash `fde04733`.
